# Vision

To be the leading centre in life sciences innovation for the development and implementation of individualized health programmes based on the most advanced health technologies, collaborative expert guidance and continuous professional support available throughout the world for the betterment of the health of women, men and of their children.

# Mission

To improve the health and quality of life of women and men of all ages and ethnicities through our programmes and technology platforms, efficiently addressing and resolving health problems, in particular related to obesity and its direct impact on:

- Neurodegenerative Diseases  
Alzheimer's and Parkinson's
- Enhanced inflammation
- Musculoskeletal disorders
- Cardiovascular diseases
- Anaemia
- Cancer
- Depression

# Who we are?

A centre of innovation in the life sciences sector focused on preventative health through the development and implementation of individualized programmes based on the state-of-the-art technologies, where its members-users, women, men and children around the world enjoy services and exclusive health products receiving specialized guidance and continuous professional support .

# "If you are OK, I am OK"

**WE APPEAL TO YOUR ALTRUISTIC SPIRIT TO  
CONTRIBUTE TO OUR PROGRAMME :**

**"If you are OK, I am OK"**

in a commitment to society, to our communities  
and people anywhere in the world.

# By supporting us you are helping

Women, men and their children to successfully curve overweight and obesity through a comprehensive and individualized programme:

**My Optimal Weight Plan™** to achieve sustainable life style changes and permanently improve their quality of life including the impact of overweight and obesity on mental health.

# By supporting us you are helping

To continue and increase our research, development and innovation programmes to improve the health of women, their families and of our communities focused on the prevention of **OBESITY, DEPRESSION, TYPE 2 DIABETES, CANCER** and neurodegenerative diseases **ALZHEIMER'S** and **PARKINSON'S**.

# How? CD Believe

The CD BELIEVE was created to function as a sound-induced signature within our **Health Profile Navigator™ Platform**. It acts as a “mirror” image reflecting behavioural changes that could be indicative of the possible early onset of depression.

It contains seven pieces using harmonic overtones of contemporary music conceptualized by Dr. Gabriel Pulido-Cejudo interpreted and played on cello by producer Margaret Maria, mixed and mastered by Jeff Wolpert.

Amounts in Canadian Dollars

# There are always benefits

Undoubtedly one of the most pleasant feelings to experience is to do good to others, a singular gesture that emerges from a sense of **GRATITUDE**.

Giving beyond the sheer satisfaction that it engenders, rises as a **TRASCENDING** and priceless contribution.

Your contributions help a common cause, the health of others, a healthier world.

Your contributions translate into business development and promotional operations. In addition, contributors will be granted special gifts and discounts to programmes of MHIC.

**Your interest and generosity  
conveys a singular contribution;  
we count on it  
"If you are OK, I am OK"**
